

# State of the IO

Wolfram Sang

26.10.2018, PPC Edi 2018

# One slide summary

## Tasks

- IO in upporting mode
- add. tasks on request

## Issues

- SDHI: HS400 & tons of BSP patches
- PCIe: link handling<sup>1</sup>, 32bit DMA limitation

## Workflow

- are you guys happy?
- discussion: wiki page showing developer time?

---

<sup>1</sup>mostly understood; awesome work, Marek!

Thanks for listening!
